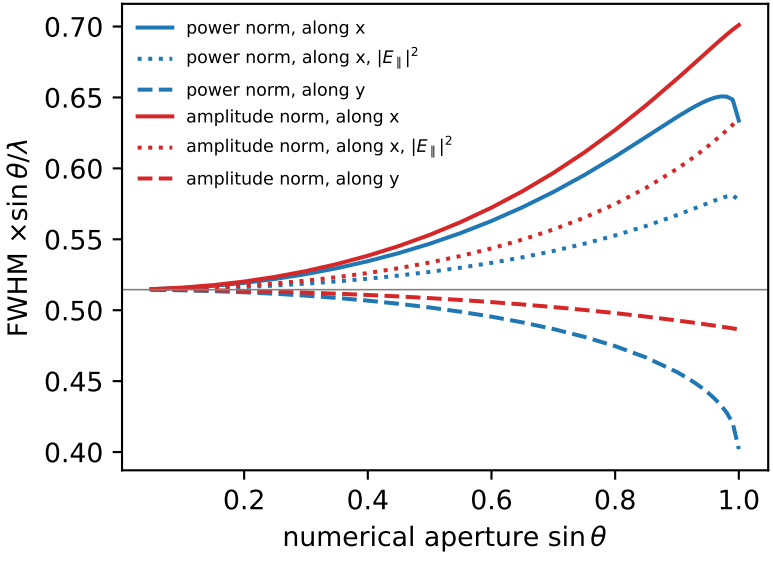
paraxial (Airy), $\rho \sin\theta/\lambda$
2π, along x (pol. axis) = Eq. E2TwoPi
4π, $\perp$ pol. = Eq. E2optFourPi
2π, along y ($\perp$ pol.) [identical]
4π, along x (pol. axis)
$|\mathbf{E}|^2$ (normalized)
radial position (λ)



power norm, along x
power norm, along x, $|E_\parallel|^2$
power norm, along y
amplitude norm, along x
amplitude norm, along x, $|E_\parallel|^2$
amplitude norm, along y
FWHM $\times \sin\theta/\lambda$
numerical aperture $\sin\theta$
